DESCRIPTORS *College Graduates; *Higher Education; *Income; *Salaries; *Wages

ABSTRACT

This report presents data concerning mean first-year earnings of college graduates from 1890 through 1969. The information is reported in a series of 6 charts: (1) estimated mean first-year earnings of college graduates (bachelor's level); (2) estimated first-year salary earnings of Wisconsin State University graduates (bachelor's level); (3) personal earnings for men by broad field of study, year of graduation, years after graduation, and age (bachelor's level); (4) personal earnings for women by broad field of study, year of graduation, years after graduation, and age (bachelor's level); (5) estimated mean first-year earnings of college graduates (master's level); and (6) estimated mean first-year earnings of college graduates (doctor's level). A bibliography is included. (HS)

ED 059677

Estimated Mean First Year Earnings of College Graduates 1890-1969

These estimates of earnings of college graduates during their first year following graduation are based on data from a variety of sources.* In making these estimates, monthly salaries of teachers were multiplied by 9.9 to convert 9-month and 10-month contracts to total first year salary earnings. Expected salary earnings of teachers were multiplied by an average of 1.155 in the case of Wisconsin men and 1.091 in the case of Wisconsin women to convert salary to estimated total first year earnings. Summary estimates were made by weighting, summing, and dividing the appropriate detailed estimates. Simple interpolations were used to fill gaps in the basic data.
